About

Clare Kinery

Software Engineer

I am an undergraduate at Michigan State University majoring in computer science through the school of engineering and minoring in graphic design. I am passionate about design and technology which lends to my interests in UX/UI and frontend development. During university, I further developed my skillset through my internship as a full-stack software engineer at Target, my position as webmaster of MSU's [ACM-W club](#), research, and personal projects.

I am a creative problem solver and motivated thinker with experience in fullstack development. Interested in my experience? Check out my [LinkedIn](#), [Resume](#), and [Github](#)! Feel free to contact me.

About

Clare Kinery

I am passionate about technology. It's rapid evolution and endless application excites me. I can often be found tinkering with new tech. As founding member of Michigan State's Girls Who Code Club I am able to share this love with the next generation of software engineers. As a daughter of an educator, community outreach and education are very important to me.

Design has been a passion of mine throughout life. This, along with my love for

technology has lead to my interest in UX/UI. I believe that technology should be visually appealing, intuitive, and accessible. In my free time, I enjoy being creative. I'm interested in all mediums that allow me to explore this! My favorite mediums include watercolor painting, drawing, and cross stitching.

I grew up in Northern Michigan, so I love the outdoors and the lake! A few of my favorite outdoor activities: running, hiking, kayaking, and biking. I am also a big fan of basketball, specifically, Michigan State's team! During the season, you can find me cheering on MSU. Go Green!
